

FOR IMMEDIATE RELEASE

INTERLINK ELECTRONICS PREVIWS THE ULTIMATE FORM AND FUNCTION PRESENTATION REMOTE CONTROL - NEW REMOTEPOINT® ONYX PERSONALIZED WIRELESS PRESENTATION REMOTE IS STYLED TO BE AS DISTINCTIVE AS ITS USERS

CAMARILLO, California, November 8th, 2006 – Interlink Electronics, Inc., a global leader in the design, development and manufacture of human interface products and technologies, previewed today in New York City, RemotePoint Onyx, the new look and feel in personalized wireless presentation control.

Interlink Electronics' new RemotePoint Onyx is a distinctively styled presentation command remote that combines an elegant look and feel with "world-class" performance. Created by Interlink Electronics' globally recognized team of human-interface engineers, RemotePoint Onyx fully optimizes its award-winning patented interface command technology heritage.

"Form, design and style are critical elements in the way we select and use products today," said Jim Reisteter, Vice President of Interlink Electronics, Inc. "Our new RemotePoint Onyx wireless presentation control console literally changes the face of presenters from grimaces of concern and anxiety to smiles of confidence by providing state-of-the-art features in a distinctively styled pocket accessory."

Interlink Industry studies report the single biggest fear for professionals today is public speaking. 50% of professionals interviewed give more than one presentation per month, 45% of the interviewees say presentations are too preparation intensive and require too much support and 36% say that presentations are tedious to watch.

"We fully understand the presentation challenges facing today's business professionals," Reisteter continued. "RemotePoint Onyx is the presenters worry-stone. It fits comfortably in the palm of your hand and enables you to naturally animate talks and communicate with audiences in a far more engaging and interactive way."

Interlink Electronic RemotePoint Onyx Features:

- An elegant and distinctive form-fitting design that combines comfort and style with world-class performance.
- AutoRF technology automatically finds a free channel and sets a secure ID to avoid interference from other remotes or networking equipment.
- Complete remote presentation control for Microsoft® PowerPoint® and Apple Keynote® that easily fits in the palm of ones hand.

- Built-in secure dock for its USB-based wireless receiver.
Interlink Electronics Previews New RemotePoint Onyx.
- Slim-line receiver design allows stacking USB devices at laptop ports.
- On-board clock for on-time presentation management.
- Fingertip control for a bright 635 nanometers low-spectrum (sight-friendly) red laser.
- Distinctive housing is tough, ultra-lightweight, abrasion and impact resistant and perfectly suited to a professional environment.
- Compatible with both Macintosh and Windows based computers.
