

INTERLINK ELECTRONICS, INC.

ACCOMPLISHMENTS

WHO IS INTERLINK ELECTRONICS?

Interlink Electronics, Inc. is the worldwide leading provider of handwritten electronic signature technology, offering a wide range of hardware, software, and custom integration solutions for capturing, binding, and processing electronic signatures into electronic documents.

It is a strong, diversified company with significant financial resources invested in biometric e-signature hardware, software, solutions, and support.

Interlink offers a full range of e-signature solutions, including the ePad family of e-signature hardware, the IntegriSign Signature software Suite, and professional services for custom e-signature applications.

Interlink Electronics, Inc. is a public company.

WHO ARE INTERLINK CUSTOMERS?

When the largest financial institutions in the world deploy an e-signature solution, they count on Interlink's technology to provide a secure, best practices approach to save time and costs.

Interlink Electronics provides the world's top banks, insurance companies, and Fortune 1000 enterprise customers with the tools and expertise to eliminate paper and save time and money. Interlink is the choice of Charles Schwab, Jackson National Life, Farmers Insurance, Ford Motor Credit, Unisys, EDS, Walgreens, and the National Notary Association.

- More than 50 banking institutions around the world have deployed over 40,000 Interlink ePads with software for opening new accounts and automating signature cards.
- ePads accompany more than 75,000 insurance agents worldwide as they electronically sign and process life insurance applications.
- Over 1,000 pharmacies, 200 hospitals, and hundreds of individual doctors' offices across the United States have deployed the ePad solution to automate the forms needed to comply with HIPAA regulations.
- ePad technologies have been deployed in thousands of auto dealerships in the US and Canada through companies such as DaimlerChrysler, Ford Motor Credit, DealerTrack, Nissan Canada, and Toyota Canada to capture electronic signatures for

leasing and financing documents.

- Companies like Schlumberger and Kodak have armed their field sales and service people with the means to execute complex transactions remotely, without the need for pen and paper, using ePad electronic signature solutions and laptop computers.

HOW DO ORGANIZATIONS BENEFIT FROM INTERLINK TECHNOLOGY?

Cost Savings

Recent studies confirm that a life insurance application that is printed, signed, shipped, prepped, scanned, indexed, and stored is ten times more costly than an application that is taken electronically and signed with an ePad. This represents a 90% decrease in costs for companies that have deployed electronic signature solutions.

Time Savings

Companies save money by saving time. Ford Credit Corporation reduced the time required to return a leased car back into its inventory from two and a half weeks to one day by deploying ePad e-signature solutions to its dealerships. Life insurance applications can now be bound in the field. Contracts can be mutually signed and instantly executed from across the globe. New account applications in banking are now opened and processed using electronic forms and electronic signatures, instantly putting the invested funds to work for both the bank and client.

Process Improvement

From sales orders to HR forms, companies are now automating their workflow and providing increased efficiency as a result of e-signatures. Walgreens, the nationwide drug chain, improved their hiring processes and reduced fraud by having all new employees sign HR documents electronically, thus eliminating the need for pen and paper documentation and saving money and time as well.

Increased Security

As world events prove, increased security measures are now being implemented by both enterprise and government bodies alike for the purpose of securing documents and the identities of document owners. Biometrics (signature and fingerprint) offer the ability to identify and authenticate an individual based on their unique characteristics.

Interlink is deployed in over 200,000 seats around the world. In fact, more than 132,000,000 e-signatures are captured every year using Interlink's technology. If you'd like to see how Interlink's e-signature solutions could help your business, please visit our website at integrign.com or call 805-484-8855 ext. 134.
