Interlink Electronics Reports Third Quarter 2018 Results

November 8, 2018 6:00 AM PST

WESTLAKE VILLAGE, CA – (Business Wire) – Interlink Electronics, Inc. (NASDAQ: LINK), a world-leading trusted advisor and technology partner in the advancing world of human-machine interface (HMI) and force-sensing technologies, today announced its financial results for the three and nine months ended September 30, 2018. GAAP net income for the quarter was \$99 thousand or \$0.02 per share, reflecting a sharp decrease from the prior year's results.

TTM EBITDA ¹	\$1,195	\$2,468	\$(1,273)	(51.6)%				

1 See attached schedules for reconciliation to GAAP numbers.

2 EBITDA margin is EBITDA divided by net revenue.

- Revenue in the third quarter of 2018 decreased approximately 28% to \$1.9 million from \$2.7 million in the same year-ago period, primarily due to the loss of a major customer who implemented a design change to their automotive product. However, revenue increased or remained steady in all other markets.
- Gross margin decreased to 54.6% in the third quarter of 2018 from 62.6% in the same year-ago period. This decrease is consistent with the decrease in revenues, as there is less revenue to cover fixed costs and production overhead costs.
- In the third quarter of 2018, net income was \$99 thousand or \$0.02 per basic and diluted share, compared to net income of \$352 thousand or \$0.05 per basic and diluted share in the same year-ago period.
- The Company generated \$176 thousand of EBITDA for the third quarter of 2018, compared with \$579 thousand in the same period in 2017. For the trailing twelve-month period ending September 30, 2018, EBITDA was \$1.2 million, down from \$2.5 million in the comparable period ending September 30, 2017.
- At September 30, 2018, the company had \$6.4 million in cash and cash equivalents, and no debt.

“The weaker financial results from the third quarter are disappointing, but not unexpected,” stated Steven N. Bronson, CEO of Interlink Electronics, Inc. “However, continuing to invest in R&D and product expansion is the right move and will lead us in a positive direction. This also includes taking advantage of this contraction to revamp our global sales organization to reflect broadened technology offerings and geographies.”

Non-GAAP Financial Information

A non-GAAP financial measure is a numerical measure of a company's performance, financial position, or cash flows that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with generally accepted accounting principles, or GAAP. Non-GAAP measures are not in accordance with, nor are they a substitute for, GAAP measures. Other companies may use different non-GAAP measures and presentation of results.

In addition to financial results presented in accordance with GAAP, this press release presents EBITDA and EBITDA margin, each of which is a non-GAAP measure. EBITDA is determined by taking net income and adding interest, income taxes, depreciation and amortization, and EBITDA margin is determined by dividing EBITDA by net revenue. Interlink believes that these non-GAAP measure, viewed in addition to and not in lieu of net income and gross margin, provide useful information to investors by providing more focused measures of operating results. These metrics are an integral

part of Interlink's internal reporting to evaluate its operations and the performance of senior management. A reconciliation of EBITDA to net income, the most comparable GAAP measure, is available in the accompanying financial tables below. The non-GAAP measures presented herein may not be comparable to similarly titled measures presented by other companies.
